Subject: Fwd: NERT Weir Treatment EE/CA (BWPC)

Alison:

I probably should have CC'd you on my recent emails re: the weir project to make certain you remain plugged in as things will be moving very fast. If you do not wish to be CC'd on everything, please let me know.

Please see below.

Nick:

Good evening.

As you are aware, NERT was ordered by NDEP to prepare an EE/CA to treat the dewatering flows associated with the upcoming SNWA weir construction project. The Trust had discussed the permitting associated with this project with you on a very preliminary basis earlier this year and we are now at the point of needing to re-verify the NPDES assumptions made in the EE/CA.

Due to the fact that the established project schedule is extremely aggressive, the Trust desires to receive your comment on the attached and establish a path forward with NDEP-BWPC on the NPDES permitting aspects of the EE/CA as soon as possible so we can finalize the overall document with NDEP-BISC.

We have tentatively scheduled a call for next Wednesday (9/14) at 1 PDT with NDEP-BISC and US EPA and would like you to join as well to provide comments from your perspective.

Would you be able to review the attached and join us for a call at this time?

Thank you,

Andrew W. Steinberg

Zach:

Good evening.

As you are aware, NERT was ordered by NDEP to prepare an EE/CA to treat the dewatering flows associated with the upcoming SNWA weir projects. Needless to say, time is of the essence across the board, and the Trust desires to receive comment and approval from NDEP on the EE/CA as soon as possible so we can move forward with the actions required to have the system ready to accept flows by June 1, 2017.

The Trust would like to receive your comment on the attached from a technical perspective as it relates to our representation of the SNWA project and how our proposed treatment system will be configured to accept your flows.

We have tentatively scheduled a meeting for next Wednesday (9/14) at 1 PDT with NDEP and US EPA and would like you to join (either in person or via dial-in) as well to provide comments from your perspective.

Please note the EE/CA itself has been previously circulated to NERT's general Stakeholder distribution list and I am unsure if it has already crossed your desk. Seeing as you have the most direct knowledge of the overall project, we would like to discuss this with you in real time alongside NDEP and US EPA.

Would you be able to review the attached and join us for a call at this time?

Thank you,

Andrew W. Steinberg
